DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I (claim 1) in the reply filed on 3-21-05 is acknowledged.

Claims 2 and 3 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group II, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 3-21-05.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Ellin.

Ellin teaches a sequential selector circuit (photographic flash firing circuit) that is a combination of interconnected integrated circuits (second sentence of abstract) to convert a change in signal voltage (low level, logic triggering or pulse triggering as described in the second sentence of the abstract) to a pulse of defined duration (flash lamp drive voltage) and apply the pulse to several outputs sequentially (each of the several flash lamps to be fired).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sugai (3,993,954) also teaches a circuit that relates to the

Art Unit: 2836

subject matter of claim 1. Lader (5,109,799) teaches a pet food dispenser that has sequential dispensing of pre-measured quantities of food.
